## Python Software Developer

Motivated and adaptable individual with a keen interest in software development, particularly in Python. Eager to launch a fulfilling career in the tech industry and contribute to impactful projects. While my formal experience is limited, I have cultivated a strong foundation in Python programming through self-study and practical projects. My dedication to continuous learning and problem-solving, combined with my ability to work well both independently and collaboratively, positions me as a valuable asset to any software development team. Seeking an entry-level position where I can apply and further develop my Python skills while contributing to the success of innovative projects.

## WORK EXPERIENCE

### L&T Technology Services Associate Engineer

09/2022 - 11/2023

- Developed and maintained C++ applications, demonstrating proficiency in C++ programming.
- Successfully managed multiple projects simultaneously, ensuring timely completion and delivery.
